		(ii)	<p>Able to choose the correct material and give explanation</p> <p><u>Answer:</u> F: Azizah should choose material Q <i>Azizah perlu memilih bahan Q</i></p> <p>E: Its absorb the least heat/ poorest conductor of heat <i>Ia menyerap paling kurang haba/ konduktor haba yang paling lemah</i></p>	1 1	2
TOTAL				6	
9	(a)	(i)	<p><i>Able to give one other element in sand</i></p> <p><u>Answer:</u> Oxygen <i>Oksigen</i></p>	1	1
		(ii)	<p><i>Able to state what happened in the experiment.</i></p> <p><u>Answer:</u> No reaction/ nothing happened/ no change <i>Tiada tindak balas/ tiada apa berlaku/ tiada perubahan</i></p>	1	1
	(b)	(i)	<p>Able to give a reason why water is not suitable to be used as a fire extinguisher to put out oil fires.</p> <p><u>Answer:</u> P1: Oil is less denser than water/ floating on water <i>Minyak mempunyai ketumpatan yang lebih rendah berbanding air/ terapung di permukaan air</i></p> <p>P2: Water will spread the fire as it flows <i>Air akan menyebarkan api kerana ia mengalir</i></p>	1 1	2
	(c)	(ii)	<p><i>Able to choose one material from Table 9 that is suitable to be used as a fire extinguishers to put out oil fires and explain.</i></p> <p><u>Answer:</u> C : Sand <i>Pasir</i></p> <p>E : Sand can cut of the supply of oxygen/ form a layer to block oxygen <i>Pasir boleh menghalang oksigen dibekalkan ke air/ membentuk lapisan menghalang oksigen</i></p>	1 1	2
	(d)		<p><i>Able to explain the characteristics of clay as a main material to form porcelain and ceramics</i></p> <p><u>Sample answer:</u> P1: Clay is soft <i>Tanah liat lembut</i></p> <p>E1: Easy to be mold in many shape <i>Senang dibentuk/ diacukan kepada pelbagai bentuk</i></p>	1 1	2

			<p>P2: Clay is insoluble in water <i>Tanah liat tidak larut air</i></p> <p>E2: Can fill up gravy in dishes//plates//bowls/ water in drink glass <i>Boleh diisi dengan kuah/lauk dalam mangkuk//bekas seramik / air untuk minuman dalam gelas seramik</i></p> <p>P3: Clay is not affected by heat <i>Tanah liat tidak ada kesan oleh haba</i></p> <p>E3: Can hold hot food/ hot drink <i>Boleh diisi dengan makanan panas / minuman panas</i></p> <p><u>Note :</u> <i>Any E with correct P – 2 marks</i></p>		
			TOTAL	8	
10	(a)	(i)	<p><i>Able to state which basket.</i></p> <p><u>Answer:</u> Ali' s basket and Tini's basket <i>Bakul Ali dan Bakul Tini</i></p>	1	1
		(ii)	<p><i>Able to state what happen.</i></p> <p><u>Answer:</u> Syukor's basket will move down and fall off the planck. <i>Bakul Syukor akan bergerak dan jatuh dari kepingan kayu.</i></p>	1	1
		(iii)	<p><i>Able to state how to solve the problem and give reasons.</i></p> <p><u>Sample answer</u> P1: Only remove Tini's basket , put each of Syukor's basket at each end of the plank. <i>Hanya alihkan bakul Tini, letak bakul Syukor di hujung kedua belah kayu.</i></p> <p>P2: Because both Syukor's basket weight the same (which is 210N) will stabilized the plank. <i>Kerana berat kedua-dua bakul Syukor adalah sama (iaitu 210N) akan menstabilkan kepingan kayu.</i></p>	1 1	2
	(b)	(i)	<p><i>Able to calculate the weight of the tree stump.</i></p> <p><u>Answer</u> Load x Distance of Load = Effort x Distance of effort <i>Daya x Jarak daya = Beban x jarak beban</i> $W \times (1.2 - 0.8) = 300 \times 0.8$ $W = 240 / 0.4$ $W = 600 \text{ N}$</p> <p><i>*substitution – 1m, final answer – 1m</i></p>	1 1	2
		(ii)	<p><i>Able to explain the consequences.</i></p> <p><u>Answer</u> F: The distance of effort will increase . <i>Jarak daya akan bertambah.</i></p>	1 1	2

			E: Thus a smaller effort will produce a larger force. <i>Oleh itu, daya yang kecil akan menghasilkan daya yang besar.</i>		
			TOTAL		8
11	(a)		<i>Able to identify and describe about the given transformer</i> <u>Answer</u> P1: Step down transformer <i>Transformer injak turun</i> P2: The number of turns in the primary coil is more than the secondary coil (vice versa) <i>Bilangan lilitan pada gegelung primer lebih banyak daripada bilangan lilitan gegelung sekunder (vice versa)</i>	1 1	2
	(b)		<i>Able to compare and contrast both of the transformer.</i> <u>Answer</u> Similarities (S): - Same input voltage for both transformer <i>Voltan input adalah sama untuk kedua – dua transformer</i> Differences (D): - The output voltage for transformer A is lower than transformer B. <i>Voltage output transformer A lebih rendah berbanding transformer B. (vice versa)</i> - Number of turns in the primary coils at transformer A is more than transformer B. <i>Bilangan lilitan gegelung primer transformer A lebih banyak berbanding transformer B. (vice versa)</i> - Number of turns in the secondary coils at transformer A is less than transformer B. <i>Bilangan lilitan gegelung sekunder transformer A kurang berbanding transformer B. (vice versa)</i> <u>Remarks:</u> Must have 1 similarity and 1 difference	1 1	2
	(c)		<i>Able to choose which transformer will increase the voltage.</i> <u>Answer</u> F: Transformer X E: Need to increase the voltage to reduce the loss of energy in the form of heat in the transmission cables. <i>Perlu meningkatkan voltan untuk mengurangkan kehilangan tenaga dalam bentuk tenaga haba di dalam kabel penghantaran.</i>	1 1	2
	(d)		<i>Able to suggest the safety measures that must be taken to avoid any accident.</i> <u>Sample answer</u> S1: Avoid touching the switch with wet hands to avoid electric shock from occurring.		

			<p><i>Elakkan menyentuh suis dengan tangan yang basah bagi mengelakkan berlakunya renjatan elektrik.</i></p> <p>S2: Avoid putting nails into the walls near the switch. <i>Elakkan meletakkan paku ke dalam dinding berhampiran suis.</i></p> <p><i>*Accept any reasonable answers</i></p>	2	2
	(e)		<p><i>Able to justify electricity safely.</i></p> <p><u>Answer</u> F: No <i>Tidak</i></p> <p>P1: The electric iron has broken insulation wires <i>Wayar seterika elektrik terdedah</i></p> <p>P2: Too many plugs are connected to one power supply. <i>Terlalu banyak palam disambungkan pada satu sumber kuasa.</i></p> <p><u>Remarks</u> Must have reason to get 1 mark</p>	1 1	2
TOTAL					10
12	(a)	(i)	<p><i>Able to state the support system for the plant in Diagram 11.1.</i></p> <p><u>Answer:</u> Prop root <i>Akar sokong</i></p>	1	1
		(ii)	<p><i>Able to explain the importance of the support system in 11(a)(i) to the plant.</i></p> <p><u>Sample Answer</u> Have big / massive trunk <i>Mempunyai batang yang besar</i></p> <p>Have big branches <i>Mempunyai dahan yang besar</i></p> <p>Tall tree <i>Tumbuhan yang tinggi</i></p> <p>Large leaves and branches / Plant with big canopy <i>Daun dan ranting yang banyak / Tumbuhan dengan kanopi yang besar</i></p> <p><u>Remark:</u> 1 point – 1 mark 2 point – 2 marks Maximum 3 point – 3 marks</p>	1 1 1	3
	(b)	(i)	<p><i>Able to state the support system that allows plant P to float.</i></p> <p><u>Answer:</u> Air space (in the leaf stalks) <i>Ruang udara (dalam tangkai daun)</i></p>	1	1

		(ii)	<p><i>Able to explain why the plants P in Diagram 11.2 float on water</i></p> <p><u>Answer:</u> E1: Air space filled in with air <i>Ruang udara diisi dengan udara</i></p> <p>E2: Air has lower density than air / making plant P to be lighter <i>Udara mempunyai ketumpatan yang rendah berbanding air / menjadikan tumbuhan P lebih ringan</i></p>	1 1	2
		(iii)	<p><i>Able to suggest Rahman can make sure the plant Q in Diagram 11.2 stay upright.</i></p> <p><u>Answer:</u> M: Add water to the container until the plant upright. <i>Menambahkan air ke dalam bekas sehingga tumbuhan tersebut tegak.</i></p> <p>E1: The plants have air space in the stem <i>Tumbuhan tersebut mempunyai ruang udara di dalam batang</i></p> <p>E2: Use water buoyancy as support. <i>Menggunakan daya apungan air sebagai sokongan.</i></p> <p><u>Remarks</u> Method : 1 mark Explanation : 1 point – 1 mark Max : 2 point – 2 marks</p>	1 1 1	3
13	(a)	(i)	<p><i>Able to name force R</i></p> <p><u>Answer</u> Frictional force <i>Daya geseran</i></p>	1	1
		(ii)	<p><i>Able to state one disadvantage of the force stated in 13(a)(i)</i></p> <p><u>Answer</u> The tyre of a bicycle / the soles of shoes get worn out (quickly) <i>Tayar basikal/ tapak kasut akan menjadi haus (dengan cepat)</i></p>	1	1
	(b)	(i)	<p><i>Able to state which surface has the greater frictional force and give explanation</i></p> <p><u>Answer</u> F: Sand paper surface <i>Permukaan kertas pasir</i></p> <p>E: Rougher surface has greater frictional force <i>Permukaan yang kasar mempunyai daya geseran yang besar</i></p>	1 1	2
		(ii)	<p><i>Able to compare the frictional force produce and give explanation</i></p> <p><u>Answer</u> D: The greater frictional force produce <i>Daya geseran yang lebih besar terhasil</i></p>	1	2

		E: because weight of the object affects the magnitude of the frictional force <i>kerana berat objek mempengaruhi magnitud daya geseran</i>	1	
(c)	(i)	<i>Able to state the relationship between the reading of spring balance and the mass of the weight</i> <u>Answer</u> (MV) As the mass of the weight increases, (RV) the reading of the spring balance increases <i>Apabila jisim pemberat meningkat, bacaan neraca spring turut meningkat</i>	2	2
	(ii)	<i>Able to state what happen to the spring balance and give explanation</i> <u>Sample answer</u> F: The spring on the spring balance has exceed its elasticity limits <i>Spring yang terdapat pada neraca spring telah melampaui had kenyal</i> E: The spring cannot returns to its original form <i>Spring tidak boleh kembali kepada bentuk asalnya</i>	1 1	2
(d)		<i>Able to write the correct procedure</i> <u>Sample answer</u> 1. The solar car model is placed on a track. <i>Model kereta solar diletakkan di atas landasan.</i> 2. Install wider tires on the solar car model <i>Pasangkan tayar yang lebih lebar pada model kereta solar</i> 3. Record the magnitude of frictional force exerted using a spring balance <i>Rekod nilai daya geseran yang terhasil menggunakan neraca spring</i> 4. Repeat the experiment using the narrower tyre. <i>Ulang eksperimen di atas menggunakan tayar yang lebih kecil</i> 1 mark/ <i>markah</i> for the correct steps <i>Untuk langkah yang betul</i> 1 mark/ <i>markah</i> for the correct sequence <i>Untuk susunan yang betul</i>	1+1	2
